NordicNeuroLab

NordicNeuroLab AS is a leading supplier of hardware and software for functional MRI studies, used for diagnosis of diseases and injuries related to brain function. Our customers include hospitals and research centres worldwide. NordicNeuroLab has 30 employees based in Bergen and sales offices in the U.S. and South Korea. Our employees have a diverse background from different disciplines and we offer excellent academic and career opportunities in a young, dynamic environment. We hold ISO 9001 and ISO 13485 certificates with worldwide distribution of our products.

Open Position for Quality Assurance

Job Description

We at NordicNeuroLab are making an effort and take pride in making high quality, regulatory compliant products for the medical market. As our products and services are going into new markets, and our new product development efforts are increasing, we search for a quality-minded person to strengthen our quality assurance efforts.

The position will be based in Bergen, Norway, and work closely with our development team as well as the full organization in following.

Main responsibilities of the position will be:
- Take responsibility of coordinating product development activities such as planning for product testing, validation and verification activities.
- Coordinate risk management activities throughout the product life cycle. This will involve planning, designing and implementing an overall risk management process.
- Follow up with end users and partners during both test phases and post market activities.
- Being involved in making strategic plans for new product introduction, communication with regulatory bodies etc. when required.
- Work closely with and serve as a liaison to members of other functional teams throughout the organization, being a resource and providing guidance and support as necessary.

The areas of responsibilities will be adjusted to match your competence and skills. The position will be challenging and demand you to take upon a large responsibility, but offers a great opportunities for your professional and career development.

We encourage both experienced and newly educated to apply.

Wanted Qualifications:

- Bachelor's or Master's degree in Biomedical engineering, Computer Science, Product development or Business; or related experience in the Quality assurance field; or equivalent combination of education and experience.
- Excellent written and verbal communication skills (English).
- Autonomous and proactive - able to work independently but also as a team member.
- Organized and attentiveness to detail.
- Good computing skills and understanding of software development and ability to do basic programming.

- Experience in the health care- and medical device industry would be preferred. Experience with MRI modalities is a great advantage.

We offer competitive salary and good insurance and pension coverage. The office is located in walking distance from the city center.

Please send your application with CV to chandana@nordicneurolab.com within 1. November 2015.
